

The FoodSaver® Brand Debuts All New GameSaver® Food Preservation Systems for the Avid Outdoorsman

May 4, 2016

Rugged, High-Performance Appliances Ensure Game and Fish Stay Fresh Five Times Longer*

BOCA RATON, Fla., May 4, 2016 /PRNewswire/ -- As spring hunting and fishing season gets underway, [FoodSaver®](#), the authority and top-selling brand in vacuum sealing food preservation technology, announces new FoodSaver® GameSaver® Food Preservation Systems in three new models. Specifically designed with today's outdoor enthusiast in mind, these vacuum-sealing appliances protect the taste and freshness of game and fish by locking out air and moisture to avoid spoilage and prevent freezer burn. The improved performance and rugged designs of the new FoodSaver® GameSaver® Systems allow for faster processing while at home or outdoors, so the game will taste as if it is fresh from the field or stream – whether enjoyed the next day or two years down the road.

The new FoodSaver® GameSaver® Systems let outdoorsmen feel confident when they enjoy and share their game and fish that it will taste as fresh as the day they sealed it. Easy to use and durable, the three new GameSaver® Systems all utilize the FoodSaver® GameSaver® Heat-Seal Bags that are made of heavy-duty, multi-layer material that blocks oxygen and moisture to maximize air removal and help prevent freezer burn long after harvesting. These new units join the successful GameSaver® Titanium that was launched in 2013 and complete the FoodSaver® outdoor line up.

- [GameSaver® Big Game™](#) - For heavy-duty use, the Big Game™ model performs up to 80 consecutive seals or up to 240 pounds of game. Designed specifically to be rugged enough for in-field processing, it features a 12-Volt DC Adapter allowing it to be used remotely with a pick-up, boat, or RV, as well as with standard household outlets. With extra-large rubberized buttons, it is easy to start and stop sealing with just one touch.
- [GameSaver® Wingman™](#) - The Wingman™ is optimal for sealing waterfowl, upland game, big game steaks and larger fish fillets. With an authentic Mossy Oak® Break-Up Infinity® Camo Pattern¹, the unit boasts a rugged style that doesn't sacrifice performance. Able to complete up to 60 consecutive seals, and continually process up to 180 pounds of game, the model features an easy-lock latch closer, roll storage, and a built in cutter for customizable bags.
- [GameSaver® Outdoorsman™](#) - Compact in size, the Outdoorsman™ model is ideal for sealing small game and fish. With the ability to perform up to 40 consecutive seals, and continually process up to 120 pounds, it features an easy-lock latch closure to ensure bags are well secured and an extra wide seal strip for the strongest seal possible.
- [GameSaver® Titanium](#) - The stainless steel Titanium model is designed for the ultimate outdoorsman with the ability to process up to 300 pounds of meat or 100 consecutive seals. Its high-performance dual pump pulls out more air for guaranteed freshness and its dual sealing strip can complete a double seal for extra security. The XL capacity accommodates 15" wide bags for the largest cuts of game and the XL patented removable drip tray allows for easy clean up.

*With traditional freezer storage, harvested game like venison will only keep three to four months, but vacuum sealing the same venison with the

FoodSaver® GameSaver® System means I can confidently prepare it for my friends and family even two to two and a half years from now," said Chef Scott Leysath, noted fish and game cooking expert. "The customizable size and sealing options of the new FoodSaver® GameSaver® models allow me to easily maintain the quality and freshness of my hard-earned game whether bringing it home from the field or packing it up for a long trip – and I know they are rugged enough to last season after season."

The FoodSaver® GameSaver® Vacuum Sealing Systems include an accessory port for compatibility with other FoodSaver® Containers and accessories. The new models are available for purchase at major sporting goods retailers, e-commerce sites and FoodSaver.com.

**When compared to ordinary storage methods like zipper bags, foil, plastic wrap and containers.*
